Profile Summary

Frontend Developer | React.js, React Native | AI-Powered Applications

Senior Frontend Developer with over 3 years of experience building scalable web and mobile applications using React.js, React Native, Redux Toolkit, Node.js, and MongoDB. Skilled in high-performance UI/UX, state management, and REST API integration. Proficient in Tailwind CSS, Material UI, Git, and Agile practices, with hands-on experience delivering AI-powered features using OpenAI and Amazon Bedrock

Experience

- Oodles Technologies Pvt. Ltd.** **Gurgaon**
Sr. Associate Consultant Frontend Development May 2022 - Present
 - Built and maintained scalable, cross-platform web applications using **React.js, Redux Toolkit, Tailwind CSS, and Node.js**, improving overall UI performance and maintainability by **30%**.
 - Designed and implemented complex, reusable UI components using **Material UI, React Hook Form, React Query, and Ag-Grid**, reducing development effort by **25%** through component reusability.
 - Integrated and optimized **REST APIs**, enhancing application responsiveness and data handling efficiency by **20%**.
 - Collaborated in **Agile environments** using **Git, GitHub, and GitLab**, improving sprint delivery efficiency and reducing integration issues by **15%** through effective problem-solving and code reviews.

Skills

- Frontend:** React.js, React Native, Redux Toolkit, JavaScript (ES6+), TypeScript, Tailwind CSS, Material UI (MUI), React Hook Form, React Query, React AG Grid, Flowbite,
- Backend:** Node.js, Express.js, Socket.IO, REST API
- Database:** MongoDB, MySQL
- AI/Cloud:** OpenAI, Amazon Bedrock (Claude, Cohere, Mistral, Llama)
- Tools & Version Control:** Git, GitHub, GitLab, Bitbucket
- Other:** Agile, Figma, Performance Optimization, UI/UX, Responsive Design, Cross-Platform Development, Progressive Web Apps (PWA), Mobile-First Design.

Projects

- Miselt** <https://miseit.ai/>
Miselt is a scalable web platform that enables **restaurant owners to manage recipes, policies, and staff workflows** through **AI-powered automation**, reducing manual effort and improving operational efficiency.
Key Contributions:
 - Designed and developed scalable UI components for multi-role dashboards using React and Tailwind CSS.
 - Integrated REST APIs to support end-to-end restaurant management workflows.
 - Implemented distributed file storage using Supabase for secure and efficient data handling.
 - Built an automated notification system using Firebase Cloud Messaging to improve real-time communication.
 - Developed an AI-driven Miselt Assistant powered by Supabase to enhance user engagement and platform usability.
 - Translated Figma designs into responsive, production-ready interfaces.**Technology:** React.js, Redux Toolkit, Tailwind CSS, React AG Grid, React Hook Form, React Query, Supabase, Firebase Cloud Messaging

Nilesh Kumar

- **Future AGI**

<https://app.futureagi.com/>

Future AGI is a scalable web platform that enables users to **build, evaluate, observe, and optimize LLM applications** without Human-in-the-Loop or Ground Truth. The platform provides interactive, AI-driven tools and insights through a modern and responsive user interface.

Key Contributions:

- Designed and developed scalable, reusable UI components using React and Material UI.
- Integrated REST and GraphQL APIs to deliver dynamic, real-time AI-driven content.
- Built reusable component libraries to improve development efficiency and maintain design consistency.
- Revamped user interfaces based on Figma designs to enhance usability and user experience.
- Implemented Mixpanel analytics for tracking user behavior and product insights.
- Contributed to the successful production launch of FutureAGI.com with improved user engagement.

Technology: React.js, Material UI, React AG Grid, React Hook Form, React Query

- **Recruit AI**

<https://recruitai.engage-ai.tech/login>

RecruitAI is an AI-driven resume analysis platform that **automates the hiring process** by evaluating uploaded resumes against **custom job descriptions** and generating relevance scores. Built as part of **Engage AI**, the platform uses semantic search to go beyond keyword matching, providing detailed insights into candidate skills, experience, and alignment with role requirements.

Key Contributions:

- Integrated REST APIs to support resume uploads, analysis workflows, and scoring results.
- Implemented session timeout handling to improve application security and user experience.
- Added robust field validations and API-driven workflows to ensure data accuracy and reliability.
- Collaborated on building a streamlined UI that enables recruiters to quickly assess candidate fit and prioritize applicants.

Technology: React.js, Redux Toolkit, Tailwind CSS

- **Heartbeat Design**

<https://www.heartbeat.design/>

A comprehensive hospital management system designed for IVF clinics, enabling **end-to-end management of patient journeys**, including registration, laboratory workflows, embryo transfer, oocyte and cryo container tracking, LMP cycle maintenance, prescriptions, and multi-role access for doctors, staff, and administrators.

Key Contributions:

- Built the reception module for patient registration and appointment workflows.
- Developed laboratory dashboards with **drag-and-drop test scheduling and management**.
- Integrated REST APIs to support real-time data flow across clinical modules.
- Created reusable and modular UI components to ensure consistency and scalability.

Technology: React.js, Material UI, ApexCharts, DevExpress React Scheduler

Education

- **Indira Gandhi National Open University**
BCA (Bachelor in Computer Application)
- **S. D. Boys Sr. Sec. School**
12th, Haryana Board

Delhi
July 2015 - June 2021

Gurgaon
April 2014 - March 2015

Certification

- Certificate of Appreciation – Extra Mile Award, Oodles Technology (Q1 2025)
- The Complete 2022 Web Development Bootcamp, Udemy
- Certificate of Completion – Node.js, Namaste Dev
- Responsive Web Page Design Workshop, Scaler Academy
